The Corporation of the City of Peterborough

By-Law Number 17-120

Being a By-law to Regulate the Removal and Replacement of Trees in the City of Peterborough, entitled the Tree Conservation By-law

Recitals

A. Section 10(2) of the Municipal Act, 2001, (the “Act”) permits a single-tier municipality to pass by-laws respecting the economic, social and environmental well-being of the municipality.

B. Section 135(1) of the Act supplements the broad power contained in Section 10(2) of the Act, and permits a local municipality to enact by-laws to prohibit or regulate the destruction or injuring of trees within the municipality.

C. Section 135(7) of the Act provides that a by-law may require that a permit be obtained to injure or destroy trees and may impose conditions to a permit, including conditions relating to the manner in which destruction occurs, the qualifications of persons authorized to injure or destroy trees and a requirement to re-plant trees.

D. City Council in recognition of the environmental, aesthetic value and public health benefits of trees wishes to conserve and protect trees within the City by regulating the destruction and injury of trees located on private property.

E. The City’s 2016 Urban Forest Strategic Plan update identified that approximately 28% of the tree canopy within the City is currently unprotected and City Council has determined that regulating and prohibiting the destruction and injury of trees is a matter respecting the economic, social and environmental well-being of the municipality.

F. City Council has determined that conserving Trees is a matter respecting the economic, social and environmental well-being of the municipality.

G. City Council has determined that it is desirable to enact a tree conservation by-law for the purpose of achieving the objectives of the City’s Urban Forest Strategic Plan, which objectives include no net loss of tree canopy and using good arboricultural practice to prolong the life of trees.

H. City Council recognizes that regulating the injury and/or removal of trees within the City will help the City achieve the objectives of the City’s Urban Forest Strategic Plan, which objectives include no net loss of tree canopy and using good arboricultural practice to prolong the life of trees.

I. City Council recognizes that, in some circumstances, a Hazardous Tree can be made safe and have its life prolonged through pruning and other good arboricultural practices.

Now therefore the Council of The Corporation of the City of Peterborough enacts as follows:
